

Contract to allow for metal detection on private property

To Whom It May Concern,

I as the landowner hereby give permission to
to search this land which is registered at

.....
.....

with a metal detector.

It is understood by both parties that all holes will be filled and that the land will be left in the same condition that it was found with as little disturbance as possible.

Respect will always be given to the landowner and I endeavour to adhere to all boundaries set out by said landowner, only searching the fields that they have specified.

Any refuse that is dug up in error will be disposed of safely away from the landowner's property, and not left in place.

The landowner will be noted of any finds which may be of importance or of significance personal to them immediately.

The landowner accepts that any unusual or historical finds must be reported to the relevant authorities.

Any finds will be shown to the landowner after all searching is done.

The landowner will get an even share (50/50 split) of any treasure found with a monetary value of more than £100.00. Any items found under this value or of little significance will be handled by myself, and shared accordingly unless a special request is made by the landowner.

Special requests.

Signed..... landowner
